## USMARC Slice Shear Force Procedure for Beef Biceps femoris long head (BF)

- This project was funded, in part, by The Beef Checkoff.

On the following slides, a picture of a frozen steak is shown rather than a cooked steak. This was done in order to more clearly show steak orientation. But, slice shear force measurement is conducted on cooked steaks. Steaks are sampled and slice shear force is measured immediately after completion of cooking.

## Biceps femoris - Left

BF

Steak 1
Steak 2
Steak 3

Steak n

## Biceps femoris - Right

## Biceps femoris LEFT

Orient the steak with the blue mark at the top right. Rotate the steak counter clockwise and make cut 1. Place in 5 cm box and make cut 2 . Rotate the piece counter clockwise and then flip it over and place it in the 45 degree box. Obtain the $1^{\text {st }}$ slice near the right side (now on the left) of the section. Obtain the $2^{\text {nd }}$ slice near the center. Obtain the $3^{\text {rd }}$ slice near the left (now on the right). Space the slices approximately equally.

it
$1^{\text {st }} 2^{\text {nd }} 3^{\text {rd }}$

## Biceps femoris RIGHT

Orient the steak with the blue mark at the top right. Rotate the steak counter clockwise and make cut 1. Place in 5 cm box and make cut 2. Rotate the piece counter clockwise and place in the 45 degree box. Obtain the $1^{\text {st }}$ slice near the right side (now on the left) of the section. Obtain the $2^{\text {nd }}$ slice near the center. Obtain the $3^{\text {rd }}$ slice near the left (now on the right). Space the slices approximately equally.

## Sample data sheet for BF SSF
