

Greetings CARMers!

Let's Recap!

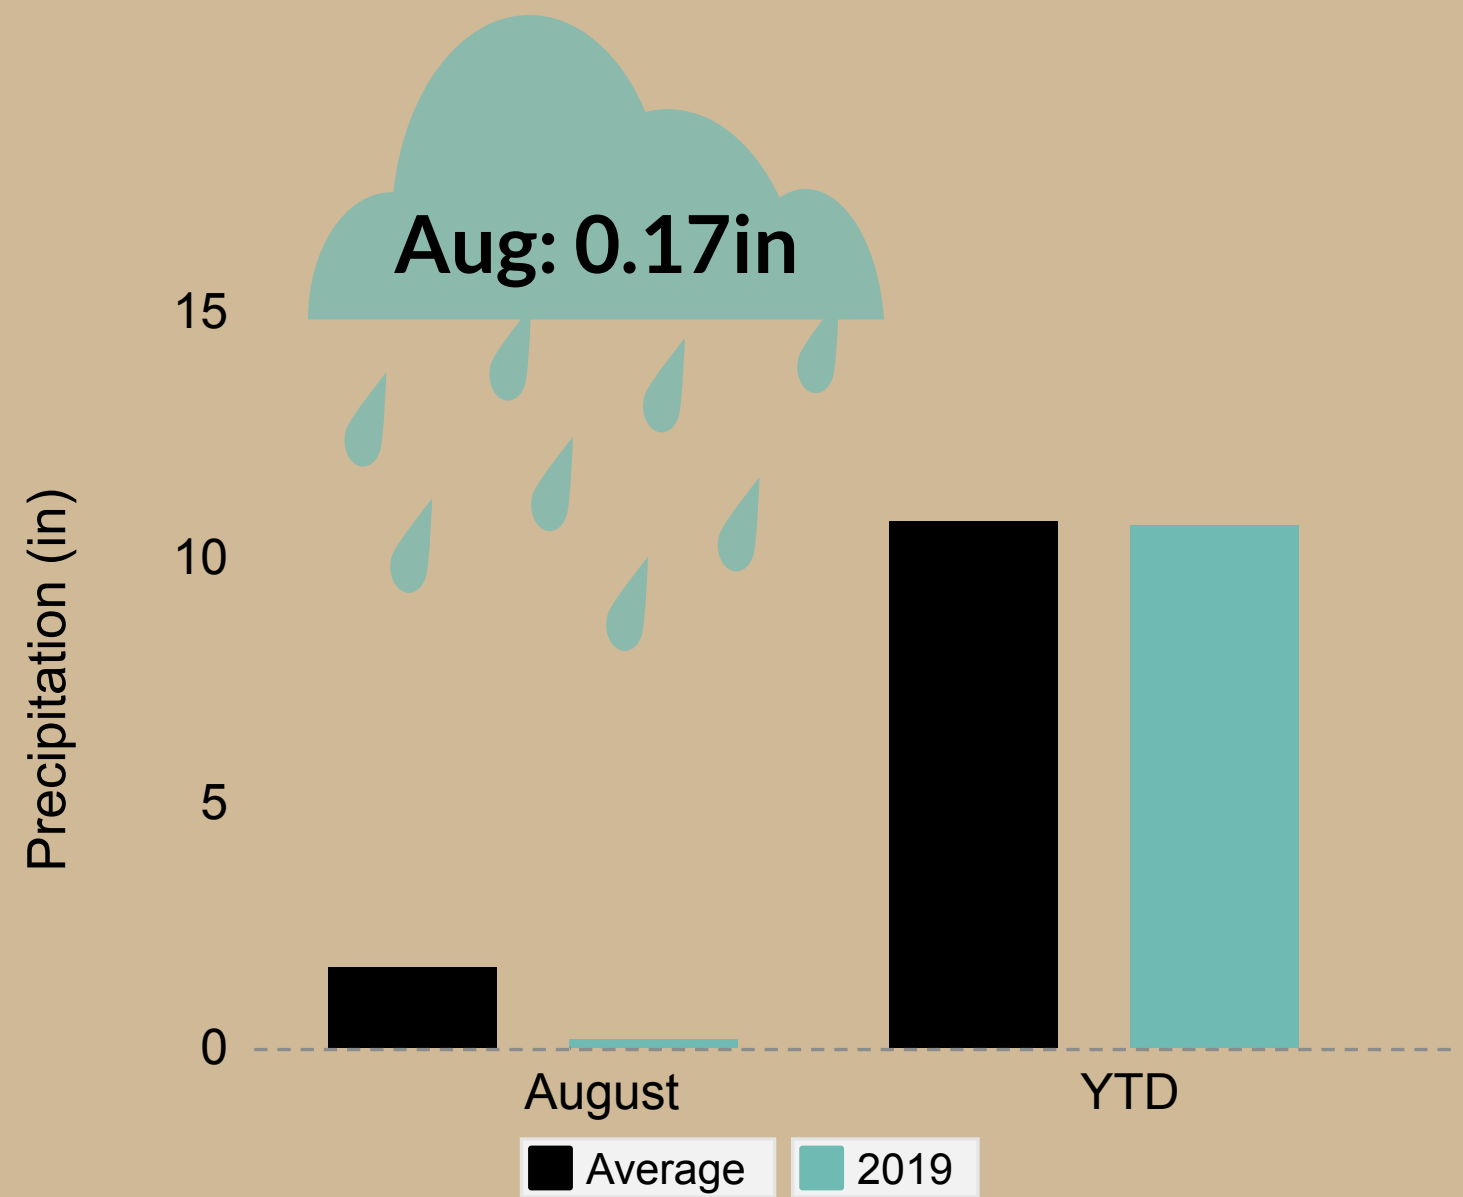

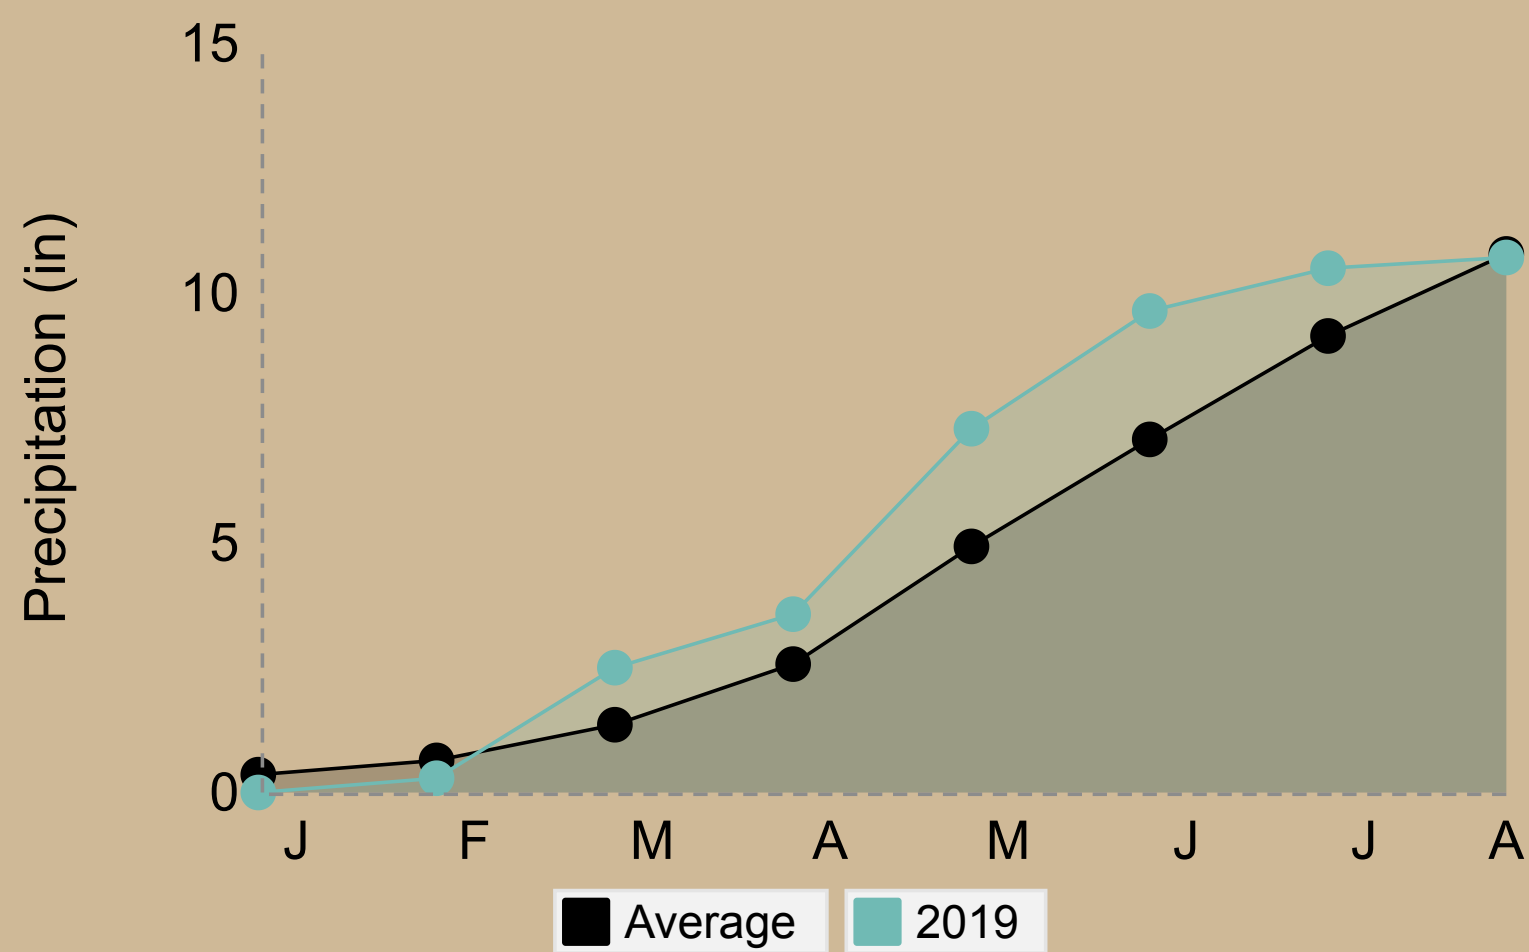

Pasture Stats:

- Herd
- Next
- Grazed
- Rest

- Mixed Soils
- Warm & Cool Season Grasses
- Vegetation Threshold 500 pounds/acre

Highlights of Happenings

Rainfall Totals

Crossroads Forage

E **F**
NOTE: Empty (E) is set at 500 lbs/acre

Exit Forage Residual

Cowboy Report

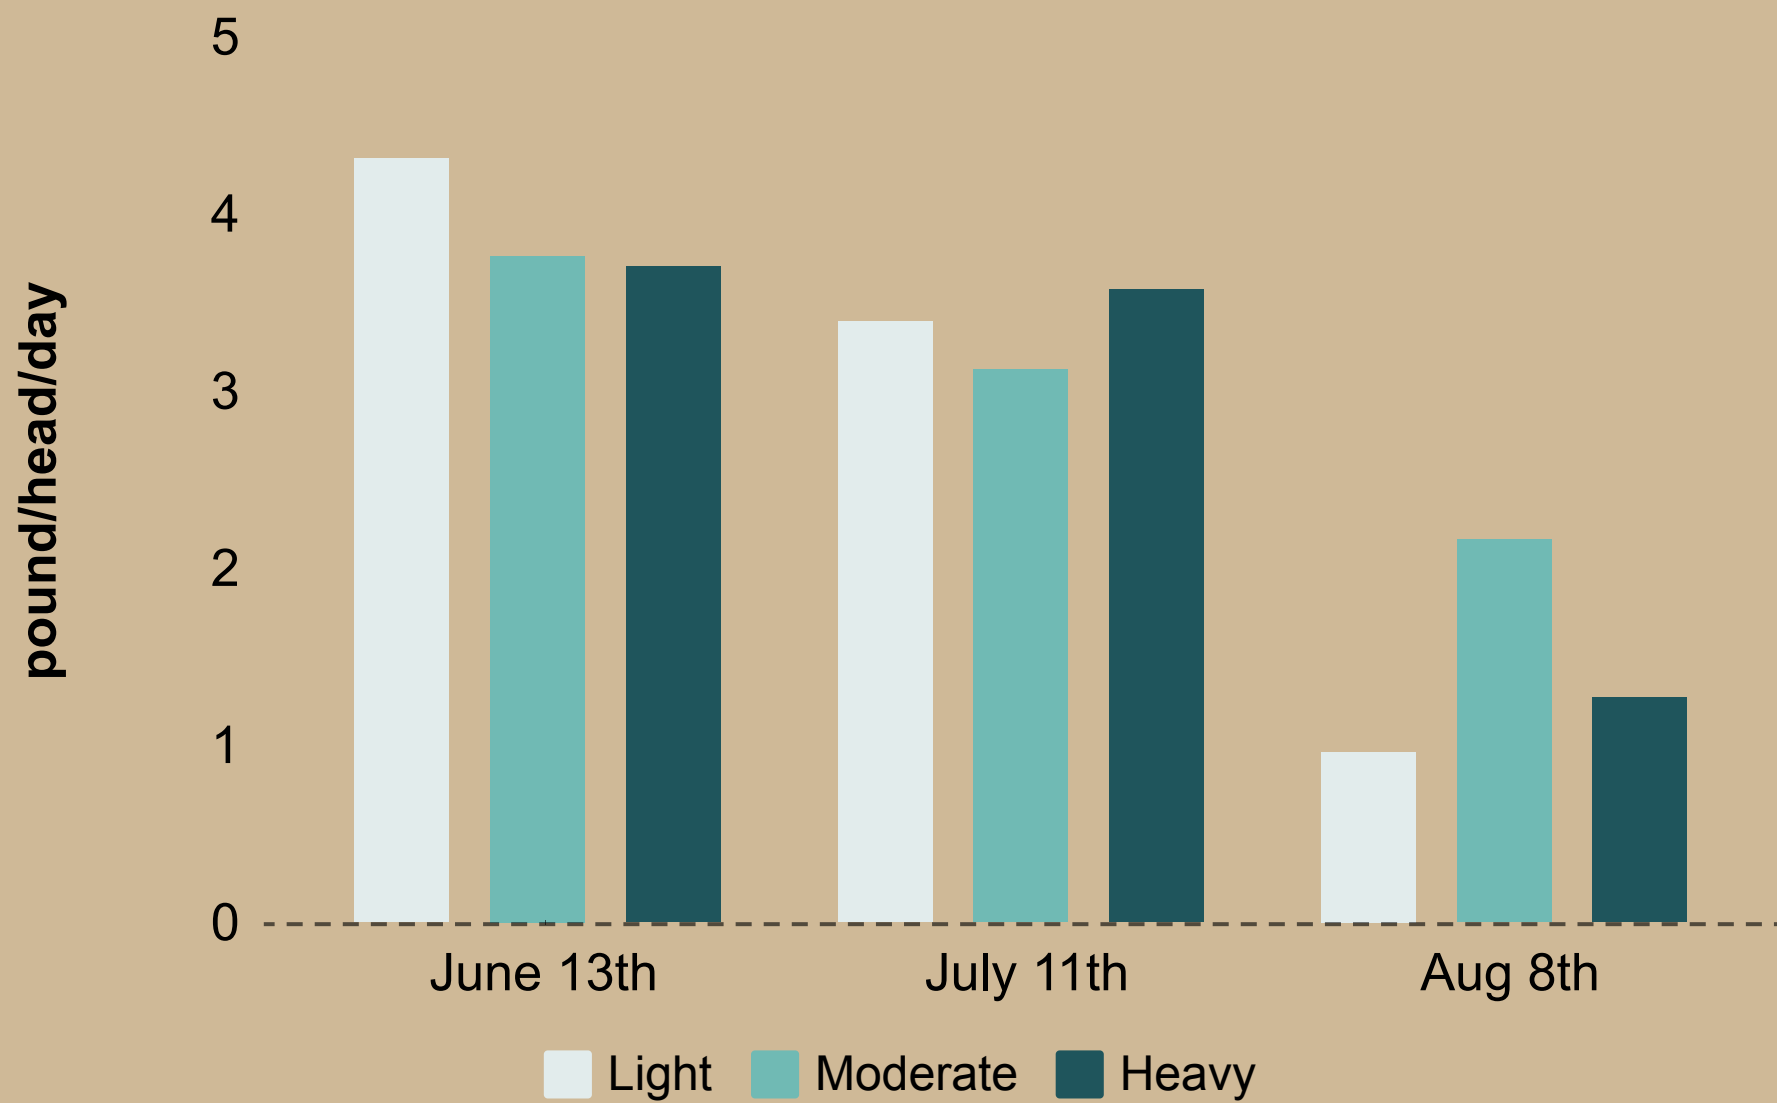

Cattle are spread out across the pasture, nothing exiting to note.

Weekly Herd Average

LTGI Average Daily Gains

The cool, wet summer played a strong role in those early gains, especially in the heavier stocked pastures.

Naturally, as we've dried out the gains have responded as such.

The Scoop on Poop

Grazing Rotation Record

| Pasture | What we wanted to happen | What actually happened | | | |
|-----------------|---|------------------------|----------|--------------|------------------------------|
| | | Date In | Date Out | Trigger Used | Notes |
| 1) Headquarters | Shoot for 14 days | 17-May | 29-May | VOR | Cold wet spring, less growth |
| 2) Elm | Shoot for 14 days, more cool seasons-wt gains | 29-May | 12-Jun | Max Days | |
| 3) Saltflat | More mixed sp. Composition-wt gains | 12-Jun | 1-Jul | Max Days | Took weights on the |
| 4) Highway | Gain potential | 1-Jul | 23-Jul | Max Days | |
| 5) Hilltank | MCLO | 23-Jul | 8-Aug | VOR | Extrapolating their |
| 6) Crossroads | MCLO | 8-Aug | | | |
| 7) South | MCLO, but will be grazed later to miss Four-wing | | | | |
| 8) Snowfence | Gains, last 14 days | | | | |
| 9) Ridgeline | Rest for GHSP, grassbank | | | | |
| 10) Nighthawk | Rest increase gain here by resting C3, and because it is not a MCLO pasture | | | | |

Always greener on the other side of the fence.

CARM herd in Crossroads.

On behalf of the USDA-ARS
Rangeland Resources & Systems Research Unit,
I thank you all
for your continued participation
in this project.

Happy Trails!
