

WEPP Journal Publications – 1989 to Present

1. Finkner, S.C., M.A. Nearing, G.R. Foster, and J.E. Gilley. 1989. A simplified equation for modeling sediment transport capacity. *Transactions Am. Soc. Agric. Eng.* 32: 1545-1550.
2. Nearing, M.A., D.I. Page, J.R. Simanton, and L.J. Lane. 1989. Determining erodibility parameters from rangeland field data for a process-based erosion model. *Transactions Am. Soc. Agric. Eng.* 32: 919-924.
3. Nearing, M.A., G.R. Foster, L.J. Lane, S.C. Finkner. 1989. A process-based soil erosion model for USDA-Water Erosion Prediction Project technology. *Transactions Am. Soc. Agric. Eng.* 32: 1587-1593.
4. Liebenow, A., W. J. Elliot, J. M. Laflen and K. D. Kohl. 1990. Interrill erodibility: Collection and analysis of data from cropland soils. *Transactions Am. Soc. Agric. Eng.* 33: 1882-1882.
5. Nearing, M. A., L. D. Ascough and J. M. Laflen. 1990. Sensitivity analysis of the WEPP hillslope profile erosion model. *Transactions Am. Soc. Agric. Eng.* 33: 839-849.
6. Nearing, M. A., L. J. Lane, E. E. Alberts and J. M. Laflen. 1990. Prediction technology for soil erosion by water: Status and Research Needs. *Soil Sci. Soc. Am. J.* 54: 1702-1711.
7. Wilcox, B.P., W.J. Rawls, D.L. Brakensiek, and J.R. Wight. 1990. Predicting runoff from rangeland catchments: A comparison of two models. *Water Resources Research* 26(10): 2401-2410.
8. Bajracharya, R.M., W.J. Elliot, and R. Lal. 1991. Interrill erodibility of some Ohio soils based on field rainfall simulation. 1992. *SSSAJ* 56: 267-272.
9. Chaves, H.M.L. and M.A. Nearing. 1991. Uncertainty analysis of the WEPP erosion model. *Transactions Am. Soc. Agric. Eng.* 34: 2437-2444.
10. Gilley, J. E. and S. C. Finkner. 1991. Hydraulic roughness coefficients as affected by random roughness. *Transactions Am. Soc. Agric. Eng.* 34(3): 897-903.
11. Gilley, J. E., E. R. Kottwitz and G. A. Women. 1991. Roughness coefficients for selected residue materials. *Journal of Irrigation and Drainage Engineering, ASCE* 117(4): 503-514.

12. Laflen, J. M., L. J. Lane and G. R. Foster. 1991. The water erosion prediction project-a new generation of erosion prediction technology. *J. Soil and Water Conservation* 46(1): 34-38.
13. Laflen, J. M., W. J. Elliot, R. Simanton, S. Holzhey and K. D. Kohl. 1991. WEPP soil erodibility experiments for rangeland and cropland soils. *J. Soil and Water Conservation* 46(1): 39-44.
14. Savabi M. R. 1991. Modeling subsurface drainage and surface runoff with WEPP. 1993. *J. Irrigation and Drainage* 119(5): 801-813.
15. Simanton, J.R., M.A. Weltz, and H.D. Larson. 1991. Rangeland experiments to parameterize the Water Erosion Prediction Project model: Vegetation canopy cover effects. *Journal of Range Management* 44: 276-281.
16. Wilcox, B.P., M. Sbaa, W.H. Blackburn, and J.H Milligan. 1992. Runoff prediction from sagebrush rangelands using Water Erosion Prediction Project (WEPP) technology. *Journal of Range Management* 45(5): 470-474.
17. Elliot, W.J., W. Qiong, and A.V. Elliot. 1992. Suitability of CLIGEN for generating rainfall data for DRAINMOD. *Applied Engineering in Agriculture* 8(6): 807-812.
18. Meyer, C.R., and D.C. Flanagan. 1992. Application of case-based reasoning concepts to the WEPP soil erosion model. *AI Applications* 6(3): 63-71.
19. Elliot, W.J., and J.M. Laflen. 1993. A process-based rill erosion model. *Trans. Am. Soc. Agric. Eng.* 36(1): 65-72.
20. Laflen, J.M., D.C. Flanagan, J.C. Ascough, M.A. Weltz, and J.J. Stone. 1994. The WEPP model and its applicability for predicting erosion on rangelands. *Soil Science Society of America, Publication* 38.
21. Risse, L.M., M.A. Nearing, and M.R. Savabi. 1994. Determining the Green and Ampt effective hydraulic conductivity from rainfall-runoff data for the WEPP model. *Transactions Am. Soc. Agric. Eng.* 37: 411-418.
22. Savabi, M.R., and D.E. Stott. 1994. Plant residue impact on rainfall interception. *Transactions Am. Soc. Agric. Eng.* 37(4): 1093-1098.
23. Deer-Ascough, L.A., G.A. Weesies, J.C. Ascough II, and J.M. Laflen. 1995. Plant parameter database for erosion prediction models. *Applied Engineering in Agriculture* 11(5): 659-666.
24. Risse, L.M., B.Y. Liu, and M.A. Nearing. 1995. Using curve numbers to determine baseline values of Green-Ampt effective hydraulic conductivity. *J. American Water Resources Association* 31(1): 147-158.

25. Nearing, M.A., B.Y. Liu, L.M. Risse, and X. Zhang. 1996. Curve numbers and Green-Ampt effective hydraulic conductivities. *J. American Water Resources Association* 32(1): 125-136.
26. Risse, L.M., M.A. Nearing, and X. Zhang, 1995. Variability in Green-Ampt effective conductivity under fallow conditions. *J. Hydrology* 169: 1-24.
27. Savabi, M.R., D.C. Flanagan, B. Hebel, and B.A. Engel. 1995. Application of WEPP and GIS-GRASS to a small watershed in Indiana. *Journal of Soil and Water Conservation* 50(5): 477-483.
28. Savabi, M.R., W.J. Rawls, and R.W. Knight. 1995. Water Erosion Prediction Project (WEPP) rangeland hydrology component evaluation on a Texas range site. *Journal of Range Management* 48(6): 535-541.
29. Zhang, X., L.M. Risse, and M.A. Nearing. 1995. Estimation of Green-Ampt conductivity parameters: Part I. Row crops. *Transactions Am. Soc. Agric. Eng.* 38(4): 1069-1077.
30. Zhang, X.C., Nearing, M.A., and Risse, L.M. 1995. Estimation of Green-Ampt conductivity parameters: Part II. Perennial crops. *Transactions Am. Soc. Agric. Eng.* 38(4): 1079-1087.
31. Zhang, X.C., M.A. Nearing, L.M. Risse, and K.C. McGregor. 1996. Evaluation of runoff and soil loss predictions using natural runoff plot data. *Transactions Am. Soc. Agric. Eng.* 39(3): 855-863.
32. Ascough II, J.C., Baffaut, C., Nearing, M.A., and Liu, B.Y. 1997. The WEPP watershed model: I. hydrology and erosion. *Transactions Am. Soc. Agric. Eng.* 40(4): 921-933.
33. Baffaut, C, Nearing, MA, Ascough II, JC, and Liu, BY, 1997, The WEPP watershed model: II. sensitivity analysis and discretization on small watersheds. *Transactions Am. Soc. Agric. Eng.* 40(4): 935-943.
34. Liu, B.Y., Nearing, M.A., Baffaut, C., and Ascough II, J.C. 1997. The WEPP watershed model: III. Comparisons to measured data from small watersheds. *Transactions Am. Soc. of Agric. Eng.* 40(4): 945-951.
35. Laflen, J.M., Elliot, W.J., Flanagan, D.C., Meyer, C.R., and Nearing, M.A. 1997. WEPP - Predicting water erosion using a process-based model. *Journal of Soil and Water Conservation* 52(2): 96-102.
36. Lindley, M.R., Barfield, B.J., Ascough II, J.C., Wilson, B.N., and Stevens, E.W. 1998. Hydraulic simulation techniques incorporated in the surface impoundment of WEPP. *Applied Engineering in Agriculture* 14(3): 249-256.
37. Lindley, M.R., Barfield, B.J., Ascough II, J.C., Wilson, B.N., and Stevens, E.W. 1998. The surface impoundment element for WEPP. *Transactions Am. Soc. Agric. Eng.* 41(3): 555-564.

38. Nearing, M.A., Bulygin, S.Y., and Kotova, M.M. 1998. Tentative verification and adaptation of the WEPP model for the Ukrainian condition: Problems, solutions, prospects. *Pochvovedenie* 31(1): 96-99.
39. Soto B., and Diaz-Fierros F. 1998. Runoff and soil erosion from areas of burnt scrub: comparison of experimental results with those predicted by the WEPP model. *Catena* 31: 257–270. [https://doi.org/10.1016/S0341-8162\(97\)00047-7](https://doi.org/10.1016/S0341-8162(97)00047-7)
40. Cochrane, T.A., and Flanagan, D.C. 1999, Assessing water erosion in small watersheds using WEPP with GIS and digital elevation models. *J. Soil and Water Conservation* 54(4): 678-685.
41. Flanagan, D.C., and Nearing, M.A. 2000. Sediment particle sorting on hillslope profiles in the WEPP model. *Transactions Am. Soc. Agric. Eng.* 43(3): 573-583.
