Instructions for installation

IPMPDynamic has been compiled for the Windows operating system. Please follow the following procedures for installation. Please refer to the tutorial (IPMP_DynamicPredictiontutorial.pdf) for instructions on how to use the software.

1) Download and save this file to your computer, preferably the Desktop.
2) Double click IPMPDynamic.zip to unzip the file
3) Click Extract to a directory. The default directory will be ..\Desktop\IPMPDynamic. Change directory if necessary.
4) Once unzip, open the directory containing IPMPDynamic files in your computer.
5) Keep all files under the same directory. Do not remove or delete any files.
6) Click IPMPDynamic.exe, and the program should work.
7) Or, you can right-click IPMPDynamic.exe, click Send to, then choose "desktop". A shortcut will be created on the Desktop. Click the shortcut Icon "IPMPDynamic.exe Shortcut" to start the program.
8) The program may start up slowly, depending on the speed of your computer. Please be patient when it starts up. Once starting up, the program should run smoothly.
9) The program does not make any changes to Windows' registry.
10) If you have any question, please e-mail Lihan.Huang@usda.gov.
