

Prof John Wallace is Leader of the Microbial Biochemistry Group, part of the Gut Health Division at the Rowett, which he joined shortly after completing his Ph.D. at the University of Glasgow in 1976. He specializes in the microbiology of animal and human digestive tracts and ruminant nutrition, and his main interests are protein metabolism, fatty acid biohydrogenation and manipulation of gut microbial activities. Prof Wallace has been coordinator of two EC-funded consortia, 'Rumen-up' and 'REPLACE', and was a member of the 'LIPGENE' and 'FEED-SEG' consortia. He is currently Deputy Editor of the British Journal of Nutrition. He was awarded the DSM Nutrition Award in 2007 'in recognition of his pioneering research in animal nutrition.

The Rowett Institute of Nutrition and Health is part of the College of Life Sciences and Medicine, University of Aberdeen. It brings together extensive capabilities and expertise in nutritional research to pursue cutting edge nutritional science. As well as state-of-the-art laboratory facilities for microbiological research, the Rowett has platform technologies including genomics, transcriptomics, proteomics and metabolomics.
